

ASSET BLASTER FREE

TRANSFORM AND ANIMATION TOOL FOR DAVINCI RESOLVE

ASSET BLASTER FREE

TURN BASIC ASSETS INTO BOLD STATEMENTS.

Core features:

Streamlined Workflow – Save hours on animations and custom styling.

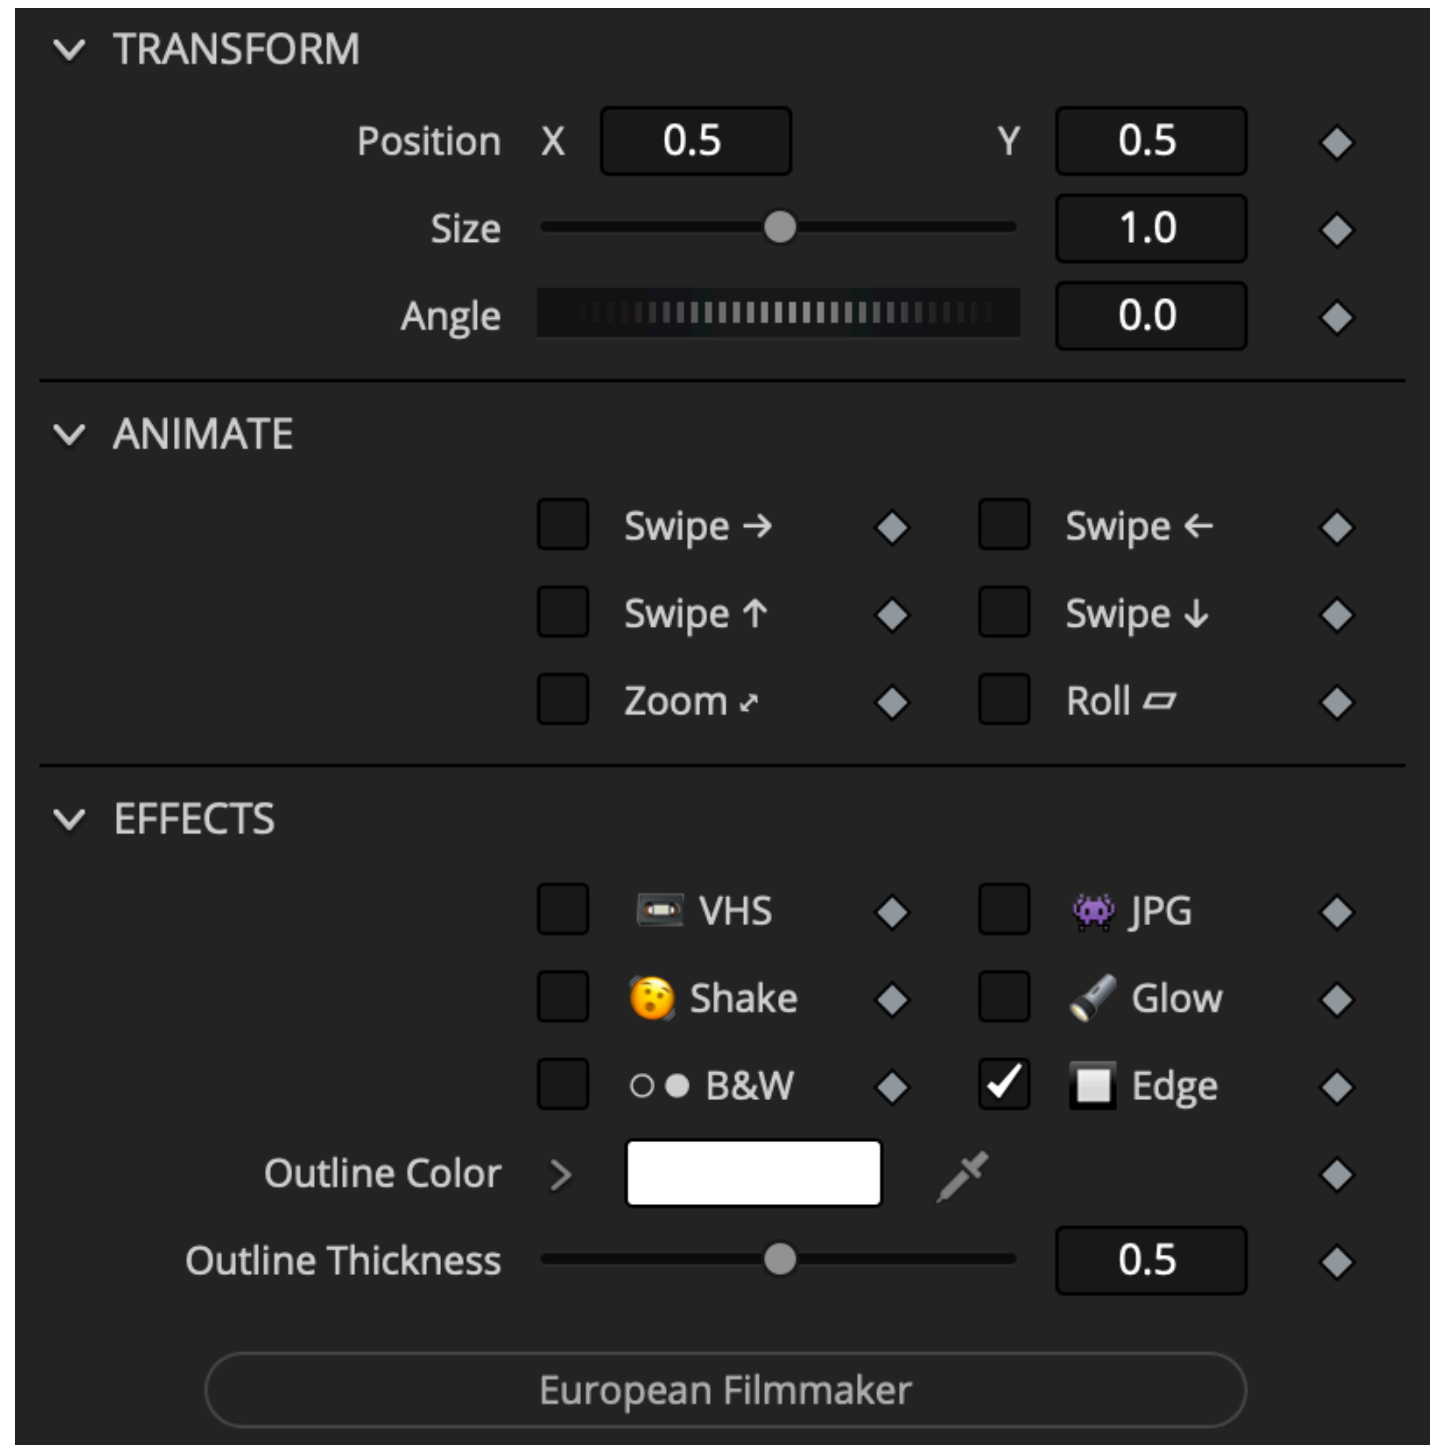

Transform Tools – Scale, rotate, and position any asset with total control.

Built-in Animations – Swipe, spin, zoom — smooth motion, no keyframing required.

Outline Magic – add instant depth and pop with a sleek customizable border.

Stylized FX – Add glowing effects, VHS overlays, and other attention-grabbing effects.

Built for DaVinci Resolve - 100% native plugin - no clunky add-ons.

TRANSFORM. ANIMATE. IMPRESS

All in a Few Clicks.

Whether you're crafting YouTube content, client videos, or cinematic reels, *Asset Blaster* helps you get there faster - with more style.

Asset Blaster is a custom Plugin for **DaVinci Resolve**, designed to save you serious time while supercharging your creativity.

If you're a pro editor or just starting out, Asset Blaster gives you the power to **transform your assets**, **animate titles**, and **add slick visual effects** - effortlessly.

With clean controls and drag-and-drop simplicity, you'll be creating motion graphics and stylized visuals like a boss.

Asset Blaster Free (Full Version): Ideal for **DaVinci Resolve Studio** users

Asset Blaster Free LT (Light Version): Optimized for **Free DaVinci Resolve**

Works both on **Mac** and **PC**.

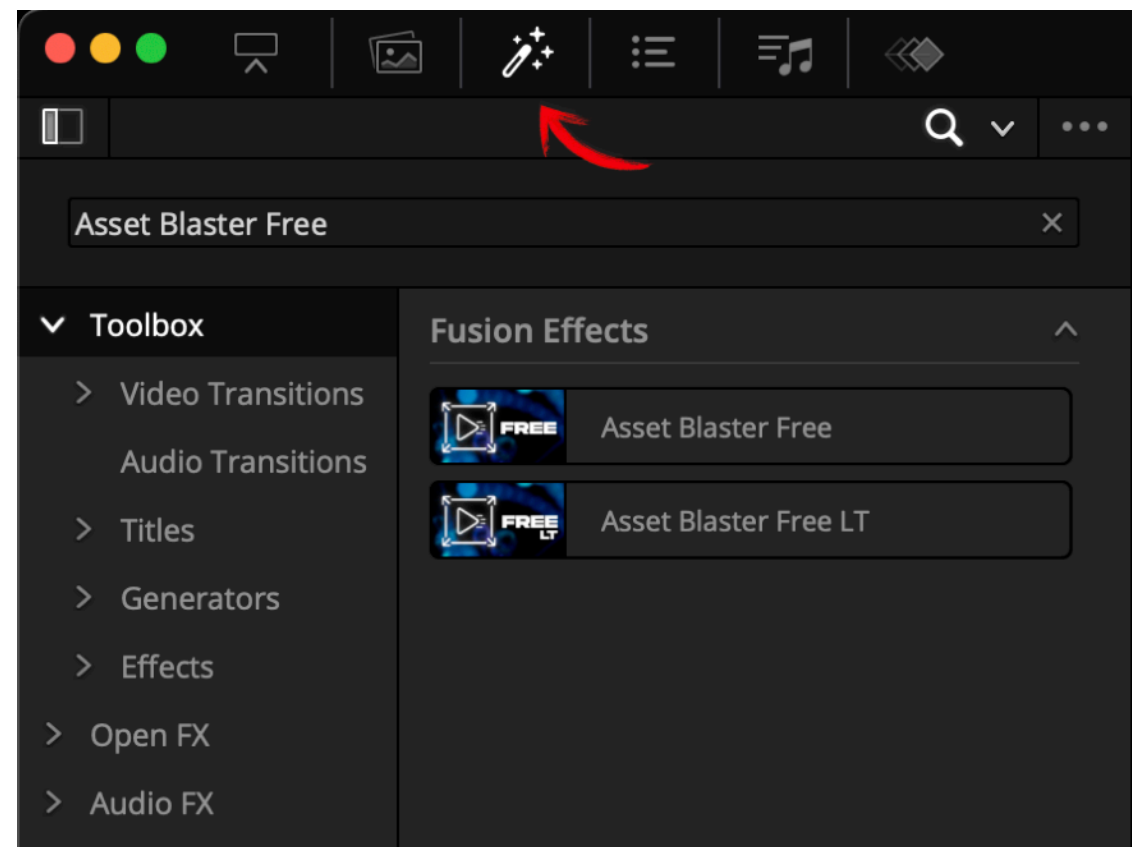

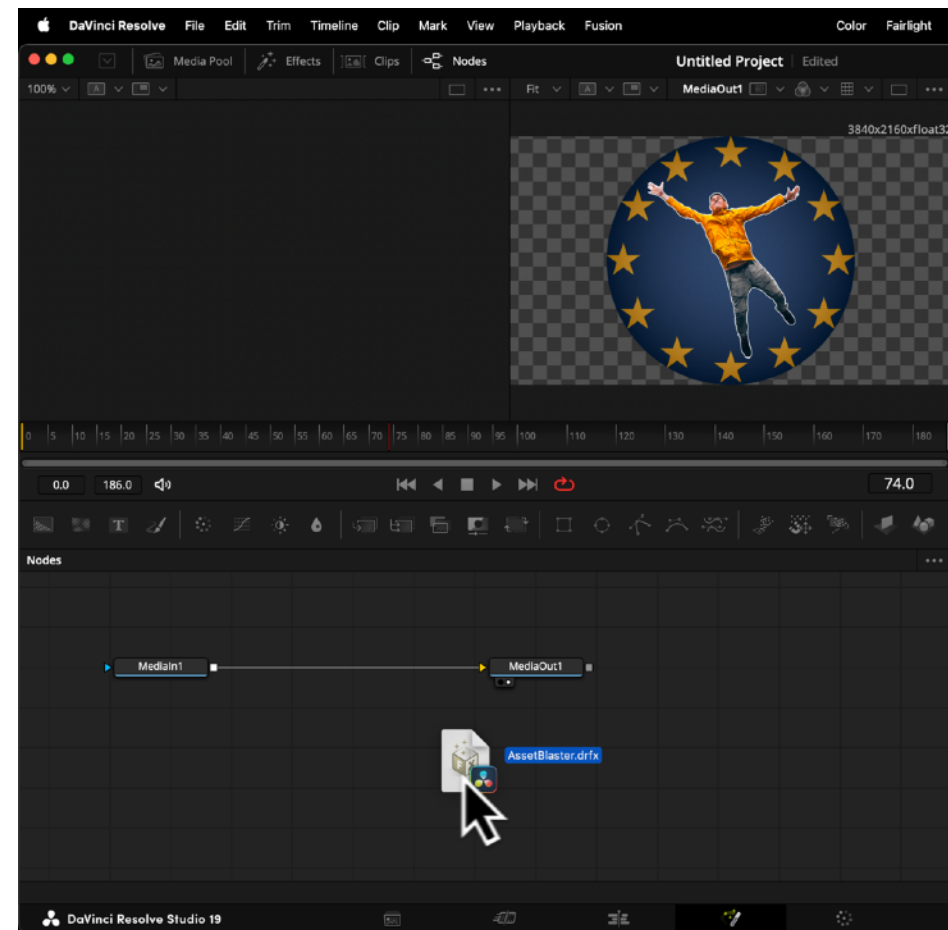

HOW TO INSTALL?

- ✓ Unzip the package.
- ✓ Double click the “**Asset Blaster Free.drfx**” or **Asset Blaster Free LT.drfx** file to install.

or

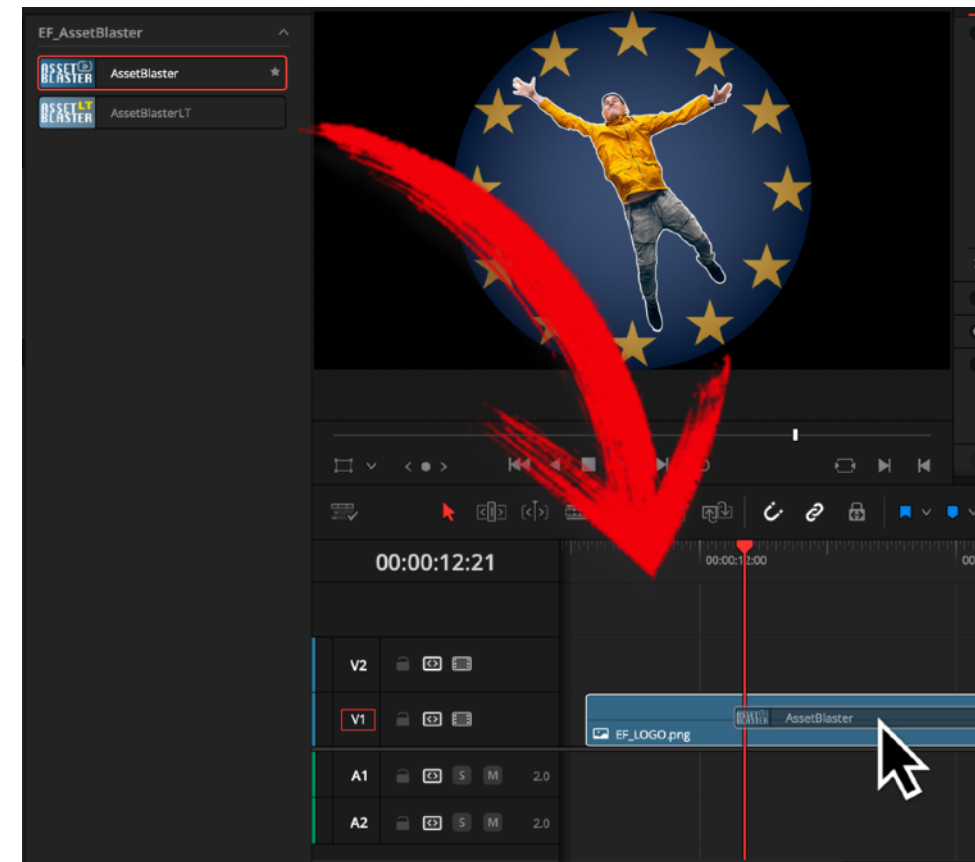

- ✓ Open DaVinci Resolve and go to the **Fusion** page.
- ✓ Drag & drop the **.drfx** file onto an empty space in the **Fusion** page.

- ✓ Restart DaVinci Resolve.
- ✓ Find the “**Asset Blaster Free**” and “**Asset Blaster Free LT**” plugins in your **Effects** panel.

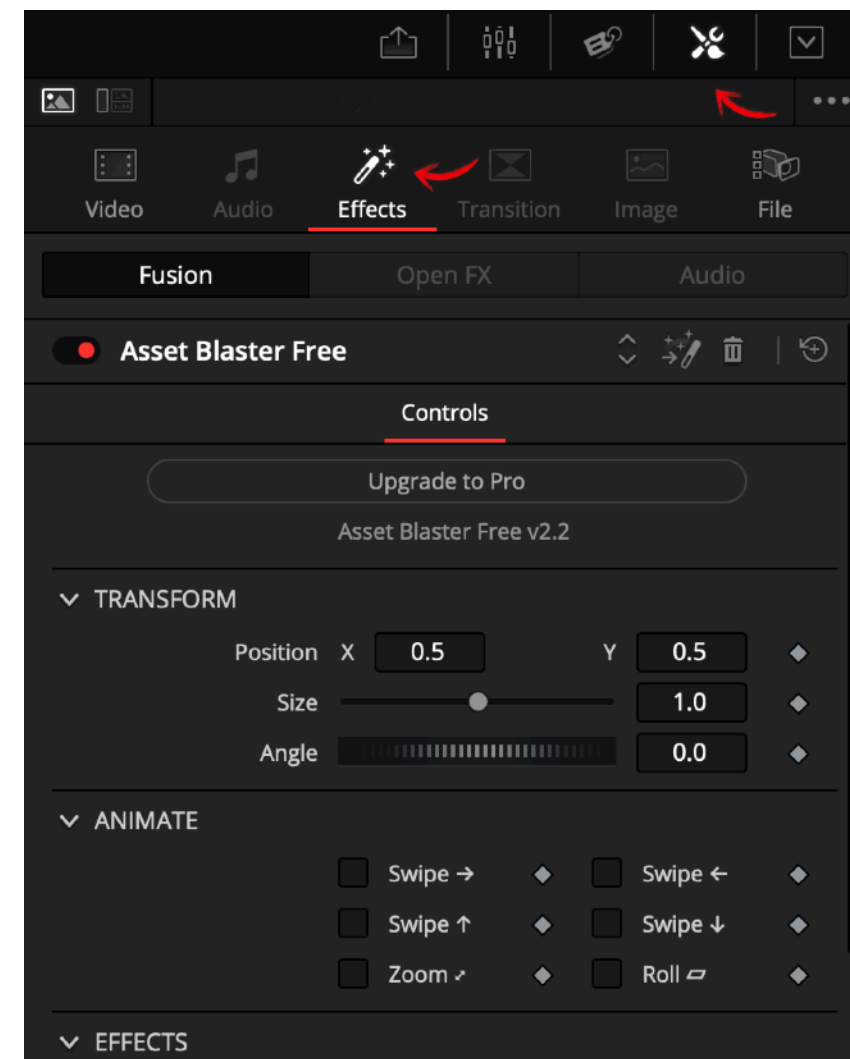

HOW TO USE IT?

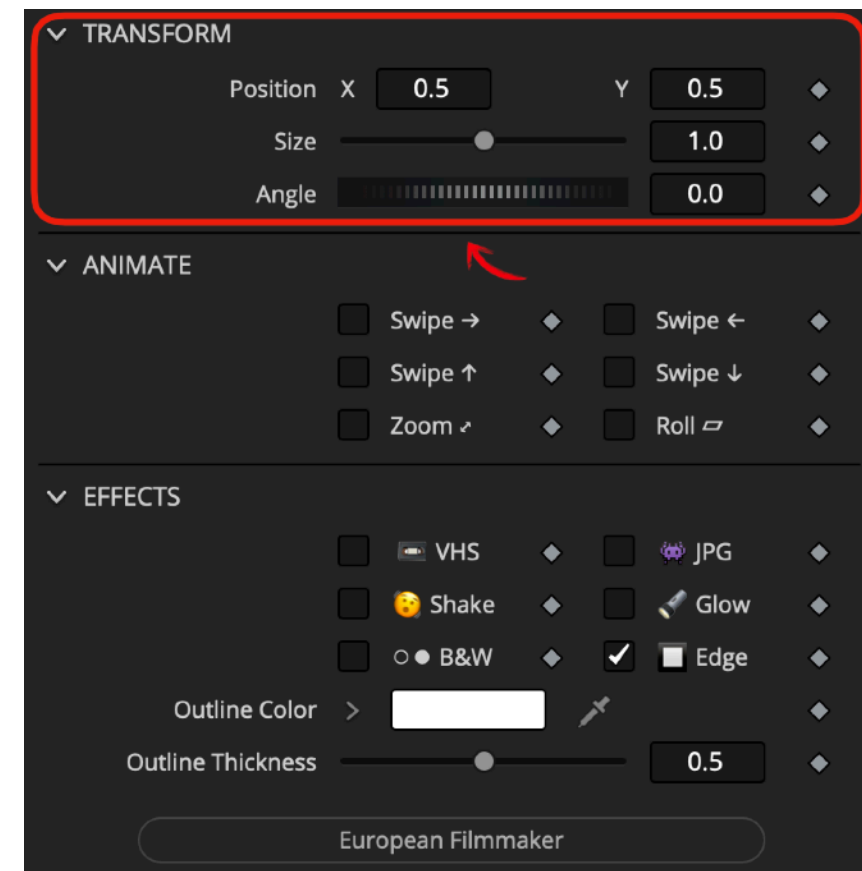

✓ First, drag & drop the effect onto your clip in the **Edit** page.

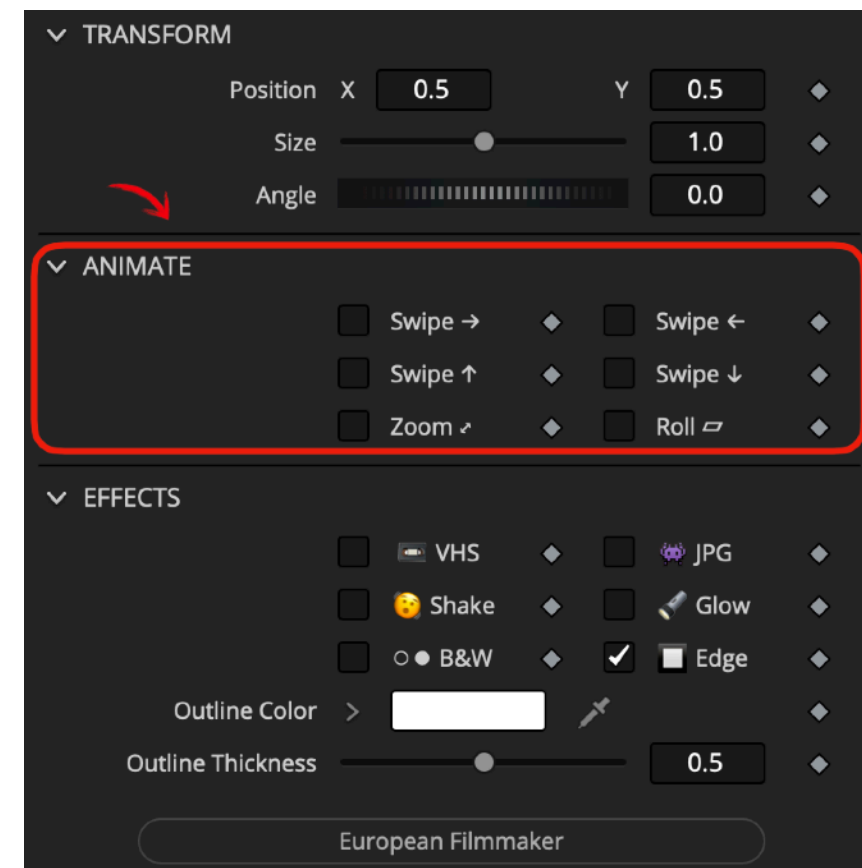

✓ Open the **Effects** panel in the **Inspector**.
Here, you'll find the “**Asset Blaster Free**” effect with its adjustments.

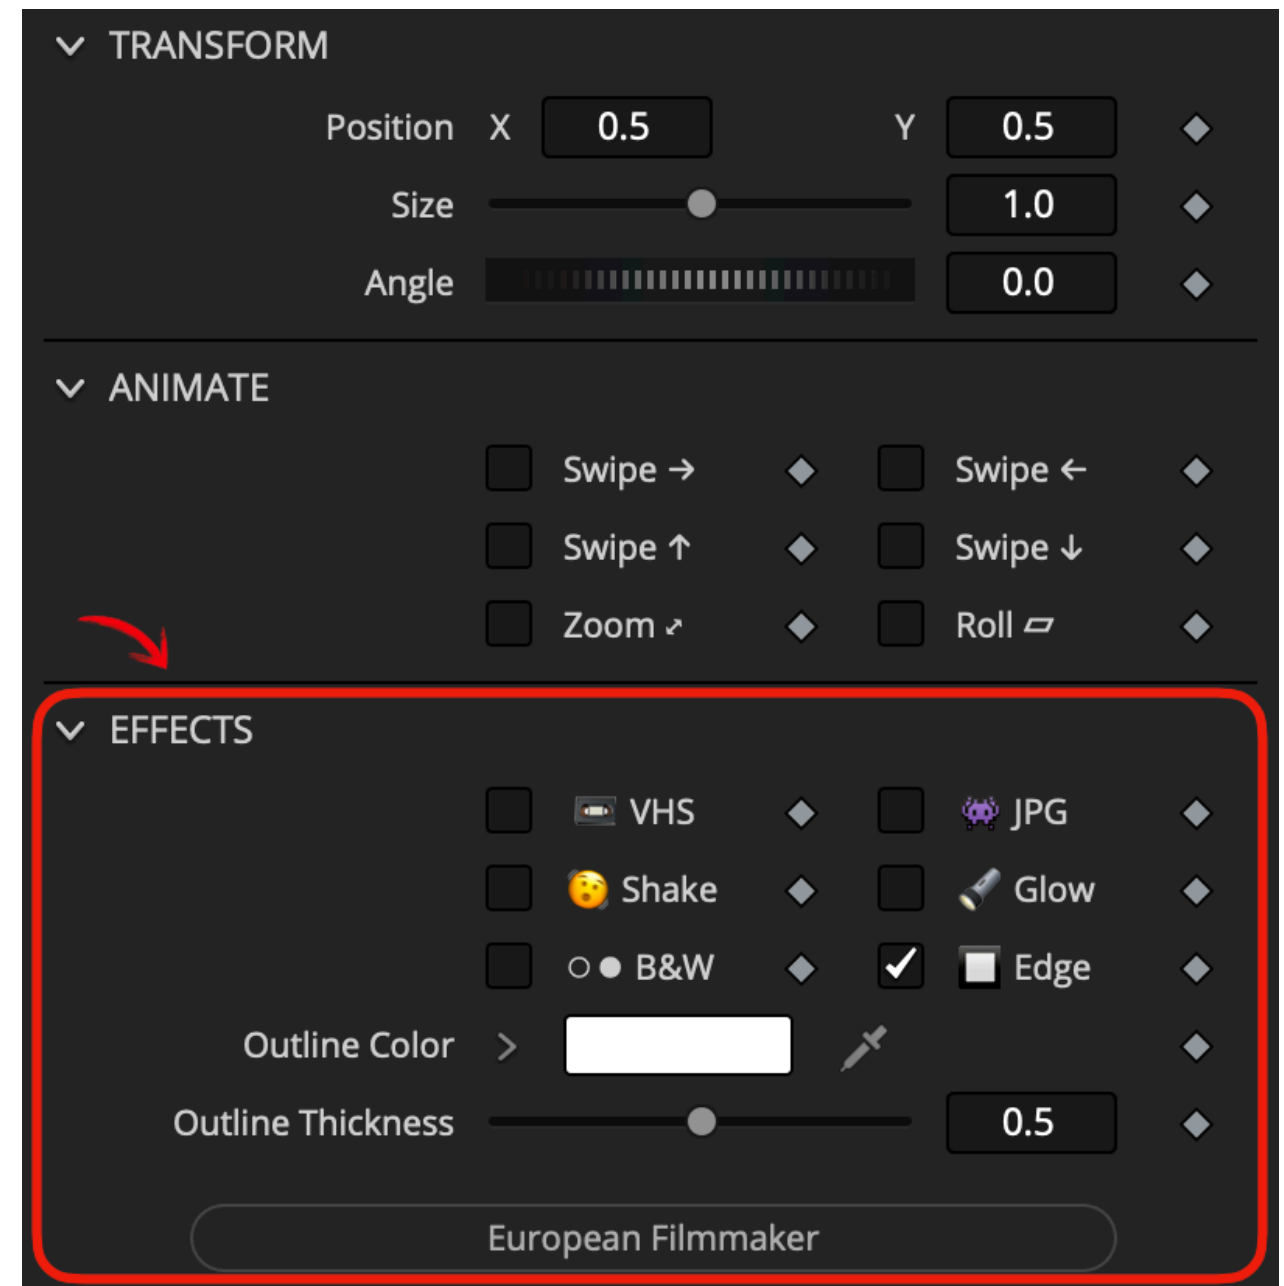

✓ The top section of the plugin is designed to transform your title or asset, just like in the “Video Inspector” tab. You can **Resize**, **Position**, and **Rotate** it.

✓ The middle section is for your asset or title transitions. These transitions are pre-animated and include a mirrored effect at the end of your clips — no keyframing needed. You can use them individually or combine multiple transitions to achieve more interesting and creative results.

✓ The bottom section is for adding and adjusting stylized effects. These work especially well with transparent **PNGs** or **titles**. You can use them individually or combine multiple effects for a more creative look more interesting and creative results.

If you want more control, effects, and speed, check out Asset Blaster Pro - more animations, advanced controls, and a cleaner workflow.
